

# Capitec Bank Holdings Limited Biannual Public Disclosures in terms of the Banks' Act, Regulation 43

## 1. Basis of compilation

The following information is compiled in terms of Regulation 43 of the Regulations relating to banks which incorporates the Basel Pillar Three requirements on market discipline. All disclosures presented below are consistent with those disclosed in terms of International Financial Reporting Standards (IFRS) unless otherwise stated. The main differences between IFRS and the information disclosed in terms of the Regulations relate to the definition of capital, the calculation and measurement thereof and adjustments made to risk weighted assets.

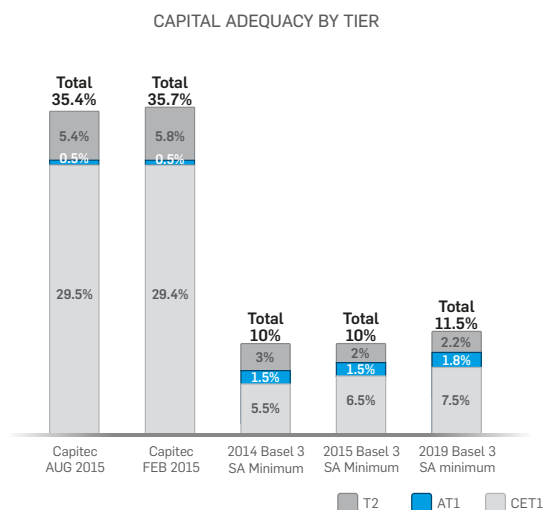

## 2. Period of reporting

This report covers the 6 months ended 31 August 2015. Comparative information is presented for the previous 6-month period ended 28 February 2015.

## 3. Scope of reporting

This report covers the consolidated results of Capitec Bank Holdings Limited.

All subsidiaries are consolidated in the same manner for both accounting and supervisory reporting purposes. All companies are incorporated in the Republic of South Africa. The registered banking subsidiary of the group, Capitec Bank Limited, has no subsidiaries.

- CET1 – Common Equity Tier 1 capital is ordinary share capital and reserves after Basel deductions.
- AT1 – Additional Tier 1 capital – Capitec's perpetual preference shares qualify as entry-level AT1 capital, and are subject to phasing-out in terms of Basel III as they do not meet new loss absorbency standards.
- T2 – Tier 2 capital – Capitec Bank's subordinated debt instruments qualify as entry-level T2 capital, and are subject to phasing-out in

terms of Basel 3 as they do not meet new loss absorbency standards. Subordinated debt is issued by the bank subsidiary so that the interest cost is offset against revenue. Subordinated debt is regarded as third party capital, subject to additional phasing-out rules, at a consolidated level. No subordinated debt instruments were issued by Capitec during the reporting period.

- Globally, the Basel 3 minimum capital adequacy percentage is 8%.
- The 2015 Basel 3 SA minimum includes the SA country buffer of 2% (2019: 1%). The level of this buffer is at the discretion of the SARB and it is subject to periodic review.
- The 2019 Basel 3 SA minimum includes the capital conservation buffer of 2.5% which phases in from 2016. All banks must maintain this buffer to avoid regulatory restrictions on the payment of dividends and bonuses.
- Excluded from the SA minima are the Basel 3:
  - Bank-specific buffers. Bank-specific buffers include the Individual Capital Requirement (ICR) and the Domestic Systemically Important Bank (D-SIB) buffer. In terms of the Banks Act regulations, banks may not disclose their ICR requirement and D-SIB requirement. The D-SIB requirement will be phased in over four years commencing January 2016. Current regulations state that the South African country risk buffer and the D-SIB buffers on a combined basis cannot be more than 3.5%.
  - Countercyclical buffer that can range between 0% and 2.5% at the discretion of the monetary authorities. It is not expected that this buffer will be applied on a permanent basis and only when credit growth exceeds real economic growth. Implementation commences in January 2016.
  - Haircuts to be applied against minority and third-party capital issued by subsidiaries, which began phasing-in from 2013 at 20% per year.

#### 4. Regulatory capital adequacy

R'000	31 Aug 2015	28 Feb 2015
<b>Composition of qualifying regulatory capital</b>		
Ordinary share capital <sup>(1)</sup>	5 649 020	5 649 071

<b>Total risk-weighted assets – regulatory</b>	<b>39 760 547</b>	36 196 409

<sup>(1)</sup> For further details of the main features of these instruments, please refer to the Main Features of Capital Instruments and Transitional Basel 3 template on the Capitec Bank website.

<sup>(2)</sup> Starting 2013, the non-loss absorbent AT1 and T2 capital is subject to a 10% per annum phase-out in terms of Basel 3.

<sup>(3)</sup> Starting 2013, a deemed surplus attributable to T2 capital of subsidiaries issued to outside third parties, is excluded from group qualifying capital in terms of the accelerated adoption of Basel 3. This deduction phases in at 20% per annum.

<sup>(4)</sup> The total capital adequacy ratio percentage is determined by dividing the total qualifying regulatory capital by total risk-weighted assets.

<sup>(5)</sup> This value is 10% of risk-weighted assets, being the Basel global minimum requirement of 8% and a South African country-specific buffer of 2%. In terms of the regulations the Individual Capital Requirement (ICR) is excluded.

<sup>(6)</sup> Risk-weighted assets are calculated by using regulatory percentages (regulatory risk adjustments) applied to the balance sheet, in order to establish the base for calculating the required regulatory capital.

<sup>(7)</sup> The adjustments reflect mainly the impact of the regulatory percentages and the addition of a risk-weighted equivalent for operational risk.

## 5. Leverage ratio

Public disclosure of the leverage ratio (calculated using the prescribed leverage ratio template) and its components was made effective from 1 January 2015. The Basel 3 leverage ratio is defined as the capital measure (Tier 1 capital) divided by the exposure measure (Total exposures), and is expressed as a percentage. This measure acts as a backstop to the risk based leverage capital adequacy ratio (see 4), by acting as a floor to restrict the build-up of excessive leverage by banks.

Capitec is conservatively leveraged with a ratio of 20% or exposure of 5 times equity (Feb 2015: 20% or 5 times equity).

The exposure used in the calculation of the ratio (see 5.2) differs from the total assets as measured using IFRS as shown below:

### 5.1 Summary comparison of accounting assets vs Leverage ratio exposure measure

Line #	R'000	31 Aug 2015	28 Feb 2015
1	Total consolidated assets as per published financial statements	58 554 318	53 916 475
	Adjustments for:		
2	Investments in banking, financial, insurance or commercial entities that are consolidated for accounting purposes but outside the scope of regulatory consolidation	-	-
3	Fiduciary assets recognised on the balance sheet pursuant to the operative accounting framework but excluded from the leverage ratio exposure measure	-	-
4	Derivative financial instruments	15 724	22 059
5	Securities financing transactions (i.e. repos and similar secured lending)	4 945	-

<b>Subtotal</b>	<b>55 038 615</b>	<b>50 432 212</b>	<b>57 209 119</b>	<b>50 094 516</b>	<b>57 021 868</b>	<b>49 968 969</b>	
<b>Off balance sheet</b>							
Corporate facilities	661	-	4 628	-	4 628	-	100
Retail personal loans							
– committed undrawn facilities	-	2 679	-	-	-	-	75
– conditionally revocable commitments <sup>(9)</sup>	433 448	388 088	531 090	469 496	531 090	469 496	-
<b>Total exposure</b>	<b>55 472 724</b>	<b>50 822 979</b>	<b>57 744 837</b>	<b>50 564 012</b>	<b>57 557 586</b>	<b>50 438 465</b>	

As required by the regulations (which incorporate Basel requirements):

<sup>(1)</sup> Average gross exposure is calculated using daily balances for the last 6 months.

<sup>(2)</sup> Items represent exposure before the deduction of qualifying impairments on advances.

<sup>(3)</sup> Represents exposure after taking into account any qualifying collateral. Amounts are shown gross of impairments, which are deducted to calculate risk-weighted assets.

<sup>(4)</sup> 'Corporate' and 'Bank' exposures were calculated based on an average, using daily balances for month 6 of the respective reporting periods. All other items are the balances at the respective month-ends.

<sup>(5)</sup> The risk weightings reflected are the standard risk weightings applied to exposures, as required by the regulations. Risk weights for exposures (other than retail) are determined by mapping the exposure's Moody's International grade rating to a risk-weight percentage using the mapping table (shown on page 6). The risk weightings for retail exposures are specified directly in the banking regulations. A standard risk weight of 75% is applied to performing retail exposures while impaired exposures attract a standard 100% risk weight, net of allowed impairments.

<sup>(6)</sup> 60.1% (Feb 2015: 84.7%) of corporate (unrated) aggregate gross period-end exposure relates to investments in money market unit trusts.

<sup>(7)</sup> Sovereign comprises investments in RSA treasury bills and SARB debentures. These exposures are zero risk weighted.

<sup>(8)</sup> An ageing of impaired advances based on arrears status is shown in 6.2.

<sup>(9)</sup> These commitments are a result of undrawn loan amounts. The loans are approved with a contractual repayment period of one month or less. The bank's contractual commitment is revocable should a client not meet their contractual obligations or where the bank has determined that the client's credit risk profile has changed. 25.7% (Feb 2015: 22.7%) is expected to be drawn down within one month. As these commitments are revocable, there is no capital charge in terms of the standardised approach for credit risk.

MAPPING MOODY'S INTERNATIONAL RATING GRADES TO RELATED RISK WEIGHTS

Long-term credit assessment	Aaa to Aa3 %	A1 to A3 %	Baa1 to Baa3 %	Ba1 to B3 %	Below B3 %	Unrated %

Identified impairments	( 84 826)	( 15 031)
Balance at end of period	4 249 257	3 857 370
Unidentified impairments	3 177 772	2 701 059
Identified impairments	1 071 485	1 156 311

## 7. Liquidity measurements

### 7.1 Liquidity management

Liquidity risk is managed by Assets and Liabilities Committee (ALCO) that oversees the activities of the treasury department which operates in terms of an approved Assets and Liabilities Management (ALM) policy and approved limits, managing cash on a centralised basis.

Further information regarding liquidity management is available in the Integrated Annual Report.

This section presents various measurements of the group liquidity position.

## 7.2 Contractual and behavioural liquidity mismatches

Both the contractual and behavioural mismatches benefit positively from the high component of equity funding. This creates a greater surplus of asset cash flows over liability cash flows than at banks with lower capital ratios.

The main difference between the behavioural and contractual mismatches relates to the treatment of retail call deposits. 92% (Feb 2015: 92%) of retail demand deposits are reflected as stable, based on a one standard deviation measure of volatility, which is considered reasonable for business-as-usual conditions. In the behavioural analysis, retail fixed deposit and retail term loan contractual flows are adjusted for early settlement behaviour. Loan flows are also adjusted for expected credit losses.

### Industry comparison

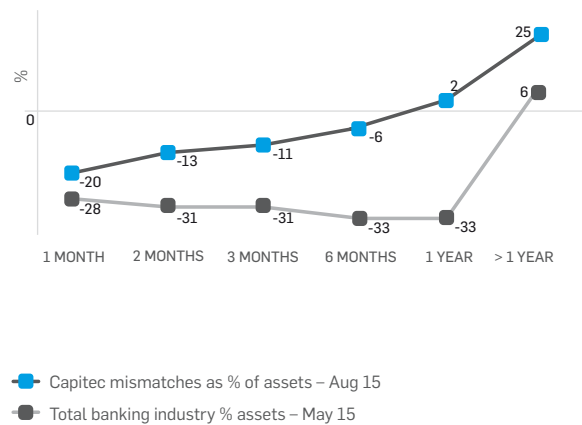

The industry comparison shows that Capitec's contractual mismatch as a percentage of assets is prudent relative to the total industry mismatch. The source data is as reported on the SARB BA 300 returns, which exclude the impact of loan impairments.

CONTRACTUAL AND BEHAVIOURAL LIQUIDITY MISMATCHES R'm

The contractual mismatch is reported on a discounted basis whereas the behavioural mismatch is reported on an undiscounted basis.

INDUSTRY COMPARISON – CUMULATIVE CONTRACTUAL LIQUIDITY MISMATCHES

### 7.3 Contractual Liquidity maturity analysis (mismatch)

The following table analyses assets and liabilities of the group into relevant maturity groupings based on the remaining period at balance sheet date to the contractual maturity date. The table was prepared on the following basis:

- Asset and liability cash flows are presented on an undiscounted basis with an adjustment to reflect the total discounted result
- The cash flows of floating rate financial instruments are calculated using published forward market rates at balance sheet date
- The cash flows of derivative financial instruments are included on a gross basis
- Contractual cash flows with respect to off-balance sheet items which have not yet been recorded on the balance sheet, are excluded (Refer to page 9 and 10 for details of off-balance sheet items)
- Adjustments to loans and advances to clients relate to deferred loan fee income
- Non-cash liabilities, representing leave pay and the straight-lining of operating leases, are disclosed as adjustments to trade and other payables

<b>Maturities of financial assets and liabilities</b> <b>(tables reflect discounted cash flows) <sup>(2)</sup></b> <b>R'000</b>	<b>Demand</b> <b>to one</b> <b>month</b>	<b>One to</b> <b>three</b> <b>months</b>	<b>Three</b> <b>months to</b> <b>one year</b>	<b>More</b> <b>than</b> <b>one year</b>	<b>Adjustment</b>  <sup>(3)</sup>	<b>Total</b>

<sup>(1)</sup> Much of the liquidity shortfall in the demand to three month categories results from the investment of excess cash in treasury bills with maturities in excess of three months. These instruments are highly liquid and can be converted to cash should the need arise.

<sup>(2)</sup> The definitions of sovereign, banks, corporate and retail are aligned with the Banks' Act Regulations.

<sup>(3)</sup> The adjustment includes adjustments to deferred initiation fees, leave pay provision, deferred income and straight-lining of lease accruals.

<sup>(4)</sup> 100% of Investments at fair value through profit or loss - sovereigns & banks relates to investments in sovereigns. (Feb: 96%)

<sup>(5)</sup> 80% of Investments at amortised cost - sovereigns & banks relates to investments in sovereigns. (Feb: NIL)

#### Off balance sheet items

The following off balance sheet items will result in a future outflow of cash subsequent to reporting date. These cash flows are regarded as transactions relating to future reporting periods and are therefore excluded from the static maturity analysis above. As a going concern, these outflows will be offset by future cash inflows.

#### (a) Operating lease commitments

Operating lease commitments relate mainly to property operating lease commitments. The future minimum lease payments under non-cancellable operating leases will result in an outflow of cash subsequent to the reporting date. The future obligations measured on a straight-lined basis are as follows:

	31 Aug 2015 R'000	28 Feb 2015 R'000
<b>Property operating lease commitments</b>		
The future aggregate minimum lease payments under non-cancellable leases are as follows:		
Within one year	322 236	307 476
From one to 5 years	907 769	835 503
After 5 years	264 036	214 233
Total future cash flows	1 494 041	1 357 212
Straight lining accrued	(76 409)	(70 473)
Future expenditure	1 417 632	1 286 739

	31 Aug 2015 R'000	28 Feb 2015 R'000
<b>Other operating lease commitments</b>		
Within one year	2 007	1 107
From one to 5 years	1 150	365
Future expenditure	3 157	1 472

**(b) Capital commitments**

Capital commitments for the acquisition of information technology hardware, improvements to leased premises and support services, that are expected to result in cash outflows by the end of the 2016 financial year, are as follows:

	31 Aug 2015 R'000	28 Feb 2015 R'000
<b>Capital commitments – approved by the board</b>		
Contracted for:	78 065	63 842
Property and equipment	70 448	54 400
Intangible assets	7 617	9 442
Non-contracted for:	413 768	629 092
Property and equipment	296 541	496 697
Intangible assets	117 227	132 395
Future expenditure	491 833	692 934

**(c) Conditionally revocable retail loan commitments**

Conditionally revocable retail loan commitments totalled R531 million (Feb 2015: R469 million). These commitments are as a result of undrawn loan amounts. These loans are advanced with a contractual repayment period of one month or less. The bank's contractual commitment is revocable should a client not meet their contractual obligations or where the bank has determined that the client's credit risk profile has changed. 25.7% (Feb 2015: 22.7%) of the value of these commitments is expected to be drawn down within one month. As these are one month loans, repayment of any future draw downs must also occur within the month.

## 7.4 Liquidity coverage ratio (LCR) - common disclosure template

The LCR is a 30-day stress test, using the 3 month end balances as data points to calculate an average for the quarter, which requires banks to hold sufficient high-quality liquid assets to cover envisaged net outflows. These outflows are calibrated using prescribed Basel factors applied to assets and liabilities in a static run-off model. Basel definitions are used to identify high-quality liquid assets.

The LCR calculation has been revised to include the updated Basel weightings and disclosures made effective January 2015.

Line #	Group and bank R'000	Total Unweighted Value (Average) 31 Aug 2015	Total Weighted Value (Average) 31 Aug 2015	Total Weighted Value (Average) 28 Feb 2015
<b>High-Quality Liquid Assets</b>				
<b>1</b>	<b>Total high-quality liquid assets (HQLA) (see 7.4.1)</b>		<b>6 339 307</b>	6 006 253

4	Less-stable deposits	<b>33 681 937</b>	<b>2 184 227</b>	1 888 919
5	Unsecured wholesale funding, of which:	<b>10 732 448</b>	<b>295 572</b>	81 094
6	Operational deposits (all counterparties) and deposits in networks of cooperative banks	-	-	-
7	Non-operational deposits (all counterparties)	<b>144 457</b>	<b>14 450</b>	15 729
8	Unsecured debt	<b>10 587 991</b>	<b>281 122</b>	65 365
9	Secured wholesale funding		-	-
10	Additional requirements, of which:	<b>529 329</b>	<b>18 287</b>	16 088
11	Outflows related to derivative exposures and other collateral requirements	<b>2 194</b>	<b>2 194</b>	1 754
12	Outflows related to loss of funding on debt products	-	-	-
13	Credit and liquidity facilities	<b>524 185</b>	<b>13 143</b>	11 410
14	Other contractual funding obligations	<b>2 950</b>	<b>2 950</b>	2 924
15	Other contingent funding obligations	-	-	-
<b>16</b>	<b>Total Cash Outflows</b>		<b>2 498 086</b>	1 986 101
<b>Cash Inflows</b>				
17	Secured lending (e.g. reverse repos)	<b>567 061</b>	<b>567 061</b>	334 876
18	Inflows from fully performing exposures	<b>7 034 618</b>	<b>6 368 827</b>	6 239 006
19	Other cash inflows	<b>58 877</b>	-	154
<b>20</b>	<b>Total Cash Inflows</b>	<b>7 660 556</b>	<b>6 935 888</b>	6 574 036
21	Total HQLA		<b>6 339 307</b>	6 006 253
22	Total Net Cash Outflows <sup>(1)</sup>		<b>624 522</b>	496 525
<b>23</b>	<b>Liquidity Coverage Ratio (%)<sup>(2)</sup></b>		<b>1 015%</b>	1 210%

<sup>(1)</sup> As Capitec has a net cash inflow after applying the run-off weightings, outflows for the purpose of the ratio are deemed to be 25% of gross outflows.

<sup>(2)</sup> There is no difference between group and bank level.

## 7.4.1 Composition of high-quality liquid assets

	31 Aug 2015	28 Feb 2015
<b>Total level one R'000 qualifying high-quality liquid assets<sup>(1)</sup></b>	<b>6 339 307</b>	6 006 253
Cash	<b>2 414 469</b>	2 367 139
Qualifying central bank reserves	<b>761 289</b>	749 044
Specified debt securities issued in Rand by the central government of the RSA or the Reserve Bank	<b>3 163 549</b>	2 890 070

<sup>(1)</sup> Capitec does not have any investments in level two high-quality liquid assets

## 7.4.2 Diversification of funding sources

- Capitec has no exposure to institutional or corporate call accounts.
- Fixed-term deposits - wholesale (listed) and wholesale (listed subordinated debt) comprises domestic medium-term notes listed on the JSE Limited. Investors in these bonds comprise: banks, insurance companies, fund managers and pension and provident funds.
- Wholesale (other) comprises deposits negotiated on a bilateral basis.
- Retail refers to individuals/natural persons.

### 7.4.3 Derivative exposures and potential collateral calls

The below tables provide information on the potential exposure to margin calls on derivative exposures.

All derivatives are entered into for the sole purpose of risk mitigation in the banking book.

#### Derivative financial instruments: cash flow hedges

R'000	Notional amount in ZAR	Fair values	
		Assets	Liabilities
<b>AUG 2015</b>			
Interest rate swaps	4 726 349	( 42 777)	-
Cross currency interest rate swaps	343 500	( 60 866)	-
<b>Net</b>	<b>5 069 849</b>	<b>( 103 643)</b>	<b>-</b>
<b>FEB 2015</b>			
Interest rate swaps	6 130 349	(29 273)	22 127
Cross currency interest rate swaps	343 500	(5 060)	1
<b>Net</b>	<b>6 473 849</b>	<b>(34 333)</b>	<b>22 128</b>

Maturity analysis R'000	Demand to one month	One to three months	Three months to one year	More than one year	Grand total
<b>AUG 2015</b>					
Discounted swap cash flows	1 798	( 1 924)	( 5 366)	( 37 285)	( 42 777)
Discounted cross currency interest rate swap cash flows	-	5 546	14 709	( 81 121)	( 60 866)
<b>Net</b>	<b>1 798</b>	<b>3 622</b>	<b>9 343</b>	<b>( 118 406)</b>	<b>( 103 643)</b>
<b>FEB 2015</b>					
Discounted swap cash flows	1 870	(1 100)	(327)	(7 589)	(7 146)
Discounted cross currency interest rate swap cash flows	-	6 197	17 508	(28 764)	(5 059)
<b>Net</b>	<b>1 870</b>	<b>5 097</b>	<b>17 181</b>	<b>(36 353)</b>	<b>(12 205)</b>

Gains and losses are recognised in other comprehensive income on rate swap contracts and will be continuously released to the income statement in line with the interest expense and foreign currency movement on the underlying hedged items.

The forecast cash flows presented above show how the cash flow hedging reserve will be released to the income statement over time. The swaps have quarterly reset and settlement dates. The forecast cash flows were based on contracted interest and ruling exchange rates.

## Derivative financial instruments: economic hedges

R'000	Notional		Fair values	
	USD	ZAR	Assets	Liabilities
	R'000	R'000	R'000	R'000
<b>AUG 2015</b>				
Forward foreign exchange contracts	-	-	-	-
<b>FEB 2015</b>				
Forward foreign exchange contracts	1 942	20 976	(1 513)	-

Forward foreign exchange contracts represent commitments to purchase foreign currency, including undelivered spot transactions and were entered into to match corresponding expected future transactions to the amount of NIL (Feb 2015: R21 million).

## 8. The net stable funding ratio (NSFR)

	31 Aug 2015	28 Feb 2015
<b>NSFR</b>		
NSFR%	142	138
Required stable funding (R'm)	32 822	31 257
Available stable funding (R'm)	46 654	43 215

The NSFR is designed to ensure closer matching of long-term asset cash flows with long-term funding cash flows. A ratio of 100% or more represents compliance. Compliance is required by 2018.

Early compliance with the two recent Basel ratios underscores Capitec's conservative approach to liquidity management. Our NSFR% is calculated as per the SARB rules in force. Basel has proposed adjustments to the calibration of the ratio. These changes make it easier to comply. If these changes were applied at 31 August 2015 the NSFR% ratio would have been 174%.

## 9. Interest rate risk

The equity sensitivity analysis below shows how the value of equity would be impacted by a 200 basis point increase or decrease in interest rates. The resulting values are expressed as a percentage of equity before applying the change in rates. The analysis is performed on a discounted run-off basis in line with the regulations.

Sensitivity of equity	31 Aug 2015		28 Feb 2015	
	R'000	%	R'000	%
<b>200 basis points shift</b>				
Increase	( 569 928)	(4.2)	(428 945)	(3.5)
Decrease	613 483	4.3	434 686	3.6

## 10. Qualitative disclosures and accounting policies

The regulations require that certain qualitative disclosures and statements on accounting policy be made. These were made in the Integrated Annual Report for the financial period ended 28 February 2015, in the remuneration report, corporate governance and risk management review and statements on group accounting policy. The disclosures in this report should be read together with the Integrated Annual Report, Main Features of Capital Instruments and Transitional Basel 3 Template. These disclosures can be found on the Capitec Bank website under Investor Relations, Financial results, Banks Act Public Disclosure.
