⁽¹⁾ Retained earnings are stated net of unappropriated profits of R3.192 billion.

⁽²⁾ Bank-specific buffers include the Pillar 2B idiosyncratic capital requirement (ICR) for specific bank risk and the Domestic Systemically Important Bank (D-SIB) buffers. Current regulations state that the Pillar 2A South African country risk buffer and the D-SIB on a combined basis cannot be more than 3.5%. In terms of South African Banks Act regulations, banks may not disclose their ICR.

⁽³⁾ The countercyclical buffer can range between 0% and 2.5% at the discretion of the monetary authorities. It is not expected that this buffer will be applied on a permanent basis and would only be applied when credit growth exceeds real economic growth.

⁽⁴⁾ Capitec Bank is classified as a Domestic Systemically Important Bank (D-SIB) but not as a Global Systemically Important Bank (G-SIB).

Linkages between financial statements and regulatory exposures

This section outlines the treatment and the carrying values as published in the financial statements and used for the various regulatory risk categories, along with the carrying values of the items for the calculation of regulatory capital. Certain differences arise as a result of differing treatment under regulatory and IFRS rules. The carrying values of the items subject to the regulatory framework are based on average daily balances (where applicable) as required in terms of the Regulations relating to banks (Reg 23 & Reg 24). The Off-Balance Sheet amounts are post application of Credit Conversion Factors (CCF) and Credit Risk Mitigation (CRM) to derivative exposures under counterparty credit risk.
